

ActivTable. Working together, learning together, achieving together.

The ActivTable, with its 46-inch HD LCD touch sensitive display, is an interactive table designed to facilitate collaborative learning and problem solving activities, while empowering teachers to differentiate instruction. A dynamic learning environment that builds important 21st Century skills such as communication and critical thinking, the ActivTable encourages students to lead their own learning with inclusive activities that drive creativity and consensus decision-making.

Why ActivTable?

Drive participation

Easily differentiate activities to create a flexible, inclusive learning environment for students of all comprehension levels. Chair and wheelchair accessibility enable every student to participate.

Increase student engagement

Create new and extended learning opportunities with exciting multi-touch and multi-user activities and content.

Personalize instruction

Divide the classroom into groups based on level of comprehension and learning styles and utilize the ActivTable as a learning center for small group instruction.

Cultivate lifelong skills

Challenge students to understand different perspectives and develop higher-order reasoning and problem-solving skills by fostering collaboration in the classroom.
