With the Accent 1000, users can communicate freely at home, in the classroom, and in medical environments, and participate in personal decisions and vocational pursuits which enhance quality of life.

### **Accent™ 1200**

Accent™ 1200 is a high-performance AAC solution configured as a standalone device. It's also available as a powerful host for our NuEye™ Tracking System.

The powerful AAC solution from PRC, Accent 1200 makes communicating and connecting faster and easy for pediatric, teen, and adult users.

Accent 1200 is preloaded with PRC's Unity® language development software and features an array of built-in support resources for users and clinicians, including a Context-Sensitive Help function and language development resources from PRC's AAC Language Lab. Individuals using Accent 1200 can also enjoy social interaction with friends and family via two cameras for picture-taking.

### **Words for Life™ NOVA Edition**

Words for Life (WFL) - NOVA Edition features the WFL 84-location vocabulary on an Android platform in a durable, sleek portable device. The WFL vocabulary is an adaptation of the Unity® language system that supports the Language Acquisition through Motor Planning (LAMP) approach. Also Included within the vocabulary are software supports such as Vocabulary Builder™ and Word Finder™ to make learning

and support easier. With the introduction of Words for Life - NOVA Edition, PRC is now addressing the diverse needs of augmented communicators by offering this innovative vocabulary on Windows, IOS, and Android platforms.

### **NuEye™ Tracking System**

The NuEye™ Tracking System is setting a new standard for eye gaze systems. Compatible with the Accent 1200 and Accent 1000, now you can access the full communication & computing power with just your eyes!

The NuEye Tracking System attaches to the Accent 1200 or Accent 1000 device in seconds to give users full visual control of the device. Keys are "selected" by gazing for a specified period of time to generate speech. When used with the integrated version of Accent 1200, users can send emails, browse the Internet, post on social networking sites, and more.

Developed in partnership with SensoMotoric Instruments GmbH (SMI) of Germany, a global leader in eye tracking technology for more than 20 years. NuEye is ideal for children and adults who need hands-free and switch-free device access.
